

SPOKANE LABYRINTHS

Your finger labyrinth

A short guide to opening, keeping and walking your personalized labyrinth.

1 Open your walk

Tap or click the web link in your delivery email. Your walk opens in the browser on any phone, tablet or computer, and nothing needs installing.

The link is yours to keep and share: send it to your group, your clients or your congregation, or bookmark it for yourself.

3 Your keepsake file

Your delivery email also carries your walk as a single file whose name ends in **.html**. Save it to your computer, then double-click it: it opens in your web browser and works without the internet. It is your own copy to keep.

Didn't arrive? Some workplace email systems block this kind of file. Reply to your delivery email and Lori will send it again as a zipped copy.

5 Changes

Your order includes **one email of changes** after you see your preview. After that, each further change is **\$5**. A change is one item: a color, a reworded line, a logo or a title.

2 Add it to your home screen

iPhone or iPad (Safari)

1. Open your link in **Safari**.
2. Tap the **Share** button (a square with an arrow pointing up). On newer iPhones, tap ... first.
3. Choose **Add to Home Screen**, then tap **Add**.

Android (Chrome)

1. Open your link in **Chrome**.
2. Tap the **⋮** menu at the top right.
3. Choose **Add to Home screen** (on some phones, **Install app**), then tap **Add**.

4 How to walk

Place your fingertip, or your mouse pointer, on the bead at the opening and trace the path toward the center. The trail takes on color as you go, and your words appear along the way. The bead stays on the path, so there is no wrong turn.

Rest at the center as long as you like, then walk back out the way you came.

Guided walk moves the bead for you, if you would rather watch and breathe. **Chimes** turns the soft sound on or off.

6 How long your link lasts

Your link stays live for **at least two years**. If it ever has to be retired, you will hear by email **30 days** ahead. Your keepsake file keeps working on your own computer either way.
